

Name Student Survey Fall 2010

Attempts 178 (Total of 187 attempts for this assessment)

Instructions When you are finished, remember to click "submit" at the end of the survey. Thank you

- **Question 1: Multiple Choice**

Where do you live?

	Percent Answered
More than 50 miles from Shoreline	14.045%
North of Shoreline	33.146%
Shoreline area	24.157%
South of Shoreline	21.91%
Bellevue and Eastside area	6.18%
<i>Unanswered</i>	0.562%

- **Question 2: Multiple Choice**

Why did you choose to take an online class?

	Percent Answered
Schedule flexibility: couldn't come to campus on a regular basis	50.562%
Distance: live/work too far from campus	14.045%
Prefer taking classes online	14.607%
Availability: couldn't get into a traditional face-to-face class	20.225%
<i>Unanswered</i>	0.562%

- **Question 3: Multiple Choice**

If an online course you wanted was not available, which option would you choose?

	Percent Answered
Find another college offering the class online	19.101%
Not take the class at this time	34.27%
Take the class during the day on campus, if offered	24.157%
Take the class in the evening on campus, if offered	14.607%
Hope the class would be offered online in the summer	7.303%

Unanswered

0.562%

- **↕ Question 4: Multiple Choice**

The support and training was sufficient for you online class?

Percent Answered

Yes

89.888%

No

10.112%

Unanswered

0%

- **↕ Question 5: Multiple Choice**

What is your preferred web browser?

Percent Answered

Firefox

41.573%

Internet Explorer 8

47.753%

Safari

8.427%

Unanswered

2.247%

- **↕ Question 6: Multiple Choice**

Did you check your web browser settings before taking a test?

Percent Answered

Yes

31.461%

No

67.416%

Unanswered

1.124%

- **↕ Question 7: Multiple Choice**

Did you have any computer difficulties when taking a test?

Percent Answered

Yes

19.101%

No

80.337%

Unanswered

0.562%

- **↕ Question 8: Multiple Answer**

What mobile devices do you use?
(choose more than one if needed)

Answers	Percent Answered
iPhone	17.416%
iPad	4.494%
Android versions	12.36%
Smartphone	14.607%
Netbook	7.865%
Laptop	71.91%

- **Question 9: Multiple Answer**

What network connection devices do you have?
(choose more than one if needed)

Answers	Percent Answered
Wifi	72.472%
Cellular - AT&T	23.034%
Cellular - Sprint	6.18%
Cellular - Verizon	13.483%

- **Question 10: Essay**

Are there classes you would like to see online in the future?

65 Given Answers

all music classes online in some way

Just more of a selection. I take online classes because as an out of state resident I get a lower price. Once I am a resident I will go to campus because it seems like there are much more options.

Intro. Spanish

I wish there was a way to take the math and english compas tests online. I am not sure if I am going to be able to get into another college to take them.

The rest of the Art History 224 and up series.

Math and chemistry

Nope, I prefer in person classes.

All the classes that I need to take are online.

Would love to see more English classes online. Classes that focus on reading material,

understanding and analyzing it, rather than paper writing. Would also, in general, love to see more online classes that aren't an excuse for the teacher to avoid lectures or interaction. Also, it would be nice if the teachers had a realistic schedule for themselves...I've had several who were consistently and constantly late on grading and returning assignments, to the point where students could not build on previous assignments because we didn't yet know whether or not we'd done anything wrong, the first time around.

Yes. Human relations and intro to communications. I have to take those classes from highline cc because you don't offer online, which is a pain in the rear. I just want to attend one college.

They are already online class.

May be some of the Math classes.

Math 60, Math 70, and Math 80 on-line would be nice. I hate the parking on campus during the day when I have to take these classes...

Yes, I think some lab sciences would be great to have on-line. Just come on campus for the labs. That would be great!

Also, creative writing. Even though it's not my major, I would be interested just for personal development. I took a continuing education class through another college. It would be cool to have the same option at SCC--only for credit.

I also think that CPR/First Aid could be mostly on-line. Just come on campus for the skills tests.

english 102, psychology 101

My focus is on the HIIM course of study classes.

Accounting 200 level classes, Math 070. Mostly more flexibility would be nice but i now prefer to take classes online so hopefully all classes that are not hands on like art or music will be offered online.

More Math classes, especially calculus.

Foreign Language, Rosetta stone got it online how come we can't ?

I would like to see all online certificate programs offered at a random, any quarter starting point rather than the current system of having to wait for a fall quarter start for the program. This would require more hours in teaching to impliment but it would be much more convenient for all students who want to start a program any quarter.

math 80 on up

languages - Spanish

all classes

More evening classes not online classes please!

1. Native American and Early Education
2. Immigrants and Multiculturalism
3. North and South conflict
4. Job training at Early Education
5. Child Labor

more music and art, science

n/a

I'd love to see everything offered online. I would always prefer to take an online class over a traditional class and am currently enrolled in Master's classes through Liberty University's online

program. Some teachers at SCC (like my GEOG 100 teacher) need more training in how to run an online class. His Syllabus was not accurate and he never updated it. The midterms and final also had no relation to any of the reading I did and it was impossible to find the answers he was looking for, even after reading a section several times. Not enough time was given to take the tests, considering the fact that essay questions were also involved and take some of us longer than others. That is where Liberty excels. Their teachers are supportive, answer your questions instead of brushing them off and allow ample time to take the tests.

I'm only taking classes that are required for my degree and that's a specific list. If I can find the classes on-line that is my preference because I have more flexibility in my schedule.

I must say though, I miss the in-person interactions with the teacher and other students in the class. One of my teachers asked everyone to post a short bio about themselves, the other didn't. I feel like I "know" my fellow students in the class with the bios better than the class that didn't have this requirement.

I'm also seeing how teachers utilize or don't utilize all the features on Blackboard. The ones who make good use of the features Blackboard make the class more interesting and I feel like I'm learning more.

I am taking this class as part of the Health Information Technology program and so far all my classes have been available online. The flexibility of an online course has made it possible for me to take this class while working full time. Thanks

More cultural diversity classes would be nice.

Chem 121 would be nice and some of the other classes pertaining to the pre-requisites to the Nursing program

yes

I have something for you!

I am taking ACC201 online this quarter and it stinks to high heaven. When we take the Chapter tests, we do not have the ability to go back and change answers. I feel like this is hindering my grade and does not allow me the opportunity to go back and check my work. I usually finish each test about 15 minutes early. In a live classroom, I would go back and double check everything. This class is killing my GPA and I will never take another 200-level class online with him again.

I just hope and pray that I can barely pass this class so that I can take ACC103 in the Summer (online).

Should offer variable times for his live classes. So far, all I can see is that he is offering 8:30 am classes. UGH. Who in the heck would want to be in a boring ole accounting class at 8:30am? I mean, c'mon, really?!!!

Thank you for the opportunity to vent.

The earlier Math classes. I have to take Math 80 and I work nights, night classes are while I am at work and morning classes are while I am sleeping.

I have a problem with the survey as i wasn't there saturday the 25th and I don't want a no grade on my transcript I use quest dial-up and I use my desktop, the web browser that I use is bing through my yahoo browser, sincerely abd thank you and one more thing if I have already taken thid class prior and passed it and got the certificate which I can and am going to get through another agency does it matter that I didn't get it your way as long as I pass the course.

N/A

Yes, Math

not personally

CPR & firstaid

Math

This is in regards to #2 & #3: My field of study HIIM is an online program only, no class room classes offered at all. It would have been nice is N/A was offered since the answers do not pertain to my program.

I clicked on #2 and couldn't get rid of the answer, so disregard the answer. I left #3 blank because there was not an appropriate answer.

I think all classes should have an online version to make learning more accessible and more available to the masses. Online classes help stop the limiting of students in classes. I would like to see more Master's Degree programs fully online.

First Aid would be a great one to have online.

ENG 102

Communications - Public speaking classes

Yes. If available I would take classes that do not require lab or math on line. For the most part GE + Social science courses on line. The rest I prefer taking on campus either night or late afternoon classes

I'd rather see more teacher participation and feedback then another worthless online class

I am so glad to see this question! The first big issue I had was that the prerequisite Math class that I needed, a basic Algebra class, was not available online. I really think that it should be. I mean, since it is a required class for a student who wants an MCRS certificate, it is only logical to offer it online, right? I had to find the class at another community college, and have had to make four trips by car of over 200 miles each in order to complete the class. This takes up time that I need for study because each trip takes an entire day. It is also difficult for me to pay for all of that fuel.

The second major issue I have, which will probably result in my leaving Shoreline for another school, is that almost all of the required classes for the MCRS certificate are only offered once per year. If I remain a Shoreline student, I will have to stay in school for 9 quarters (including two summers). This seems ridiculous to me for a 72 credit certificate program. The last time I was in community college, I earned a 92 credit AS degree in 6 quarters. A lot of your current students need to finish fast so they can get back to work, and I am one of those students.

I would suggest that the last few classes in the program, like ICD 9/10 coding; Medical Reimbursement; CPT Coding; Intermediate Coding; Medical Coding Practicum; and Computers in Healthcare be offered more than once per year.

I understand that the HIIM program is overflowing with students now, and that you have had to turn people away. That is also a very strong reason to offer more classes.

Because I have a financial imperative to finish school in a timely manner, I will spend a portion of my winter break searching for a new school that I can transfer to.

Thank you again for asking!

more of the math classes would be awesome. if any class can be made into an online class it would

be awesome to have more choices. I unfortunately had one bad instance with blackboard for my online class. for a full two weeks i couldnt get my assignments and it put me seriously behind. i am now going to have to take the class again.it wasted my money and my time. also if you could have the orientation for blackboard more available that would be beneficial too. thankyou.

My classes are all online, so I do not have a request.

Yes-

An incubator class for an existing company who operates as an internship source for students. The company allows students to engage and participate in everyday interactions with staff and the projects the company is working on.

Creating a class for students to go to a business off campus as an internship for the clean energy program is simply a missing component in the program. It could be done very easily, let me know if you need help.

More math classes

More Art History classes

More classes in general, I really enjoy all the online classes that Shoreline CC has provided so far.

Computer classes

None. There are some courses that should not be offered online, such as statistics and coding. While I did learn from the the courses, there are so many things you cannot learn just through online lectures. I have a B.A. in Education, so I know of what I speak.

Math and Spanish/French.

All of the classes I needed and wanted were offered online!

None that I can think of. This was my first qtr here. I like that an online course gives flexibility but there are times a face to face lecture would have been preferable. Having the ability to ask questions and get answers and get more in depth information helps me understand alot better.

I believe Oceanography is an online class but is only available during Spring quarter. I really wanted to take it but was unable to get in during the last two spring quarters because it fills up so quickly. I think there should be more than one offered and it should be offered every quarter.

Any accounting classes and economics courses seem to lend themselves well to the online environment.

I would like to see every class that is not hands one (art, pe) to be offered online, and offered at more times throughout the year. I would also like to see a basic standard of guidelines for each department for how many discussion boards a week and how long they should be posted before you lose the opportunity to respond to them (longer than 2-24 hours). Group discussions that are not so complex that students cannot figure out what is going on.

None that I can think of at this time.

well the program i am trying to attend has classes i need

I would like the bug fixed that causes you to suddenly not be able to type in text fields, making you have to click elsewhere, then go back to what you were typing.

Chemistry

Digital Photography

No

None I can think of.

None that I can think of at the moment.

All business related classes available online and not just during the summer.

Yes, I am taking more classes online for my program (HIIM).

I think there's a good selection of online courses offered at this time. I would like to see more hybrid science courses. I took a hybrid course over the summer, ENVS& 101, that was perfectly suited for hybrid - we met one evening a week for discussion/labs, and the rest was done online, since there was a lot of writing involved. It was a GREAT class. I think it would be nice if more lab classes could be run this way, with meetings once or twice a week and the remainder online.

Also, some of the online classes are only offered during certain quarters, and it would be nice if more options were offered during the summer.

Thanks.

NO. I prefer taking the classes I have left on campus. Sincerely it has been really hard for me to take online classes.

I would like to see classes that offer more to the student from the teacher of the class. I have taken two writing classes during which I have had very little feedback from the teacher- how are you supposed to learn about writing in that way? It makes me feel like I am really wasting my time and money.

As many as possible, accept the ones that are not possible online (such as physical education classes) because with the certificate that I am trying to accomplish, I am unable to take some of the classes because of my availability. I would even like to see more classes that are only on campus for tests, but online the rest of the quarter.

Question 5: I do not use any of these. I use Google Chrome.

I don't think so.

I cant think of any classes specifically right now, but I know some of the classes required for my degree are not offered as an online class because it would make it very difficult. I know project management is only offered in hybrid form, and there are no substitutions. i would like to see either all of the classes required for a specific degree to be offered as an online class, or have a substitute for the class that is offered online.

Honestly I would like to see some better/more relevant classes offered on the weekends. I work full time and am going to school 3/4 time and I have found that online isn't the best medium for me.

None

English 101 maybe,depend on the credits i need

I'd like to see the ACCT 101 class removed. I'm not sure where else to post this complaint but I have never been so frustrated with a class before. This quarter I took four online courses and ACCT 101

was the most frustrating. The professor was unresponsive, and when she did respond it was a few weeks later so the material in question had been forgotten. I'm pulling a 3.7 or higher in all my classes but this and am more than happy to take the lower grade knowing I'm, done with this class. I recommend that either a new teacher take over this class or it be removed.

All classes. I work during the day and sometimes too late for evening classes. How are students suppose to afford school? It sucks for limited options for online classes. All maybe more online degrees or technical programs.

None that I can think of

No

I came to this on-line program in the HIIM Department, because this is how the course work is set up. It has worked beautifully. The instructors have been great and I have made quite a few new friends through on-line discussion. The blackboard support group has been wonderful as well and were able to assist me with various problems that arose. Thank you!

Honor's courses!!

I would definitely take off line class next time! No more on line class.

Even though I am sure this is for the last question, I would just like to say that the only thing that has disappointed me doing classes that require blackboard use is that there have been questions in which the answer choices have not been visible, and that makes it so there is no way to do the problem.

None that I can think at this time

I would like to see a greater variety of multicultural understanding classes available online. Right now there are only a couple available of probably dozen choices I have for my program, and it would be great to have more to choose from.

I would love to see more art, music, science and more computer related programs too.

I'm signed up to take a math class winter quarter, and I would have preferred to do it online because I also work, but it wasn't available. Also, I was going to take CJ&101 and it wasn't available at all, so maybe that class could have been online.

I wish the classroom portion of the Anatomy, Physiology, and Microbiology classes could be online with the use of private youtube lectures (via password). It would be useful because we could replay the videos over and over, if needed. Of course, labs would need to be scheduled on campus.

If an instructor would be willing to record and post his classroom lectures for an entire quarter, the students attending his class would benefit from having access to his lectures (as a review/study aide), and he could also use the recorded lectures for online students for years to come. It would be a useful tool for both types of classes.

For those of us who work during the day, attending an evening lecture and then a lab that goes until 9:20p.m. is very tiring! I would rather get up early and watch my lecture online before work (or during my lunch break), and then just do the lab on the way home, as opposed to lab and lecture. You asked!

N/A
