

You have **20 minutes** to complete this quiz. Do the following problems **on a separate piece of paper**. Please number each problem and clearly show your work. When possible, circle your answers. **Do not write answers on this page**. When you are finished, staple this page on **top**.

Perform the operation.

1.  $7 + (-15) = -8$

4.  $(-4)(-10)(2) = 80$

2.  $-0.65 - 2.3 = -2.95$

5.  $-0.028 \div 0.07 = -0.4$

3.  $-\frac{3}{4} - \left(-\frac{1}{10}\right) = -\frac{13}{20}$

Evaluate.

6.  $-3^2 = -9$

7.  $(-2)^4 = 16$

Perform the indicated operations.

8.  $4 - 3(5 - 7)^2 \div 2 = -2$

9.  $-\frac{1}{3} + \left(\frac{2}{5}\right)\left(-\frac{25}{8}\right) - \frac{3}{4} \div 6 = -\frac{41}{24}$
