22. What are one or two ideas/activities you learned from the workshop that you feel you will most likely apply?

Activities

Applied math and safety walk through

Being able to choose module to fit my program instead of having to buy the entire program

Minicopter was excellent

Safety program; Building a widget; planning; manufacturing

The minicopter would be great with sixth grade problem solving/following direction unit

23. What was the most positive aspect of the workshop?

Applicability of the information. I had heard of MTAG but didn't realize how easy it would be to implement.

Attitude and willingness of John to answer questions

Interaction of participants

Team problem solving exercise; cooperation without conflict

Uses resources of many folks!

Working with others; Talking with other teachers

24. What suggestions do you have for improving future workshops?

Seemed well done

Thanks

The module forms should be in Word format so they can be modified for educational and interest levels of students.  
Establish system to accept school purchase orders.

Things in Word format to modify for our own students; middle school materials; district prices
