

# Jumpstart your career in biotech!

## Biomanufacturing Training for High School Students

### Highlights:

- Gain hands-on training in a biomanufacturing lab
- Network with industry experts
- Increased job opportunities upon completion
- Earn 9 college credits with free tuition through Running Start
- Can be taken along a full-time high school schedule

## There are Two Pathways

### Pathway 1: Basics of Biomanufacturing Certificate (9 months)

High school students learn basic lab techniques in biomanufacturing, explore biotech careers, and interact with industry mentors. Tuition free through Running Start.

**Eligibility: Rising juniors and seniors**

#### Structure of Pathway 1:

**Academic Year 2023**  
Attend biomanufacturing classes at SCC, twice a week after school

Earn Basics of Biomanufacturing Certificate

### Pathway 2: Fred Hutch Lab Technician Certificate (2 years)

Expand upon the Basics of Biomanufacturing Certificate (described above) by collaborating with scientists at Fred Hutch and expanding your hands-on training with cutting edge technologies at SCC.

**Eligibility: Rising seniors**

#### Structure of Pathway 2:

**Academic Year 2023**  
Attend biomanufacturing classes SCC, twice a week after school

**Summer 2023**  
Prepaid internship at Fred Hutch Cancer Center

**Academic Year 2024**  
Full time classes at SCC

  
**Earn Fred Hutch Lab Certificate**

## Who Should Apply?

- No prior biotech experience required
- Excited about learning in a hands-on environment
- Looking for a career in a high-demand field
- Not interested in going directly to a 4-year university after high school
